

LAUNCH CREADER V

Troublecode reader with live data display and special tests

The LAUNCH CREADER V (Five) is a new and modern vehicle fault code reader for cars that are compatible with the EOBD or OBD-2 standards. It is a fast and helpful tool to do direct vehicle check, when a customer drives into the workshop. You don't always have to use your heavy diagnostics equipment for an initial test.

Apart from standardized OBD-2 codes a lot of manufacturer specific codes are supported as well. Codes are displayed as number and description. Missing trouble code descriptions are permanently updated and downloaded as internet update. You can keep the tester up to date.

modern display , intuitive to use, fast to use:

The LAUNCH CREADER V has a very modern display that is easy to read. The operation is intuitive. Your diagnostics results can quickly be shown to the customer.

Functions supported by LAUNCH CREADER V:

- Read and erase engine management fault codes
