

LAUNCH X-431 Diagun

LAUNCH X431 DIAGUN vehicle diagnostics computer with Bluetooth data transfer. Different software bundles available.

Brand new automotive vehicle diagnostics scantool as PDA running on Windows CE. The X431 is very fast and can be used within several seconds. The professional in depth diagnostics features from the X-431 model range have fully been integrated.

A wide range of electronic vehicle diagnostics systems are supported. Reading and erasing trouble codes, showing live vehicle data and basic settings, including calibrations. Beside engine-management features many additional comfort systems are supported such as ABS, AIRBAG, Light modules, Instrument Cluster, air-conditioning, transmission or multimedia systems.

Description:

Light weight and ultra-mobile

Wireless Bluetooth data transfer up to 25 meters

Enough 1 GB storage capacity on a mini-SD memory card. Large amount of stored codes or diagnostics values be saved.

Reading and erasing trouble codes

Live-vehicle data streams (customizable)

Actuator test

System search for several manufacturers

Daily access to software downloads through the internet

Working with the X-431 DIAGUN enables you to:

- Reading and erasing stored trouble codes (DTC)
- Display of error codes as code number and description
- Display live data streams and customized data lists
- Delete auto-adaptive values (engine or automatic transmission)
- Basic settings (TPS throttle, ESP, transmission)*
- Coding and Programming (Depending on manufacturer)
- Service interval reset (long life service, particle filter maintenance)
- Calibration (injector calibration FORD, Renault, MAZDA)
- Reset language of instrument cluster
- Key Coding
- CAN-BUS Diagnostics
- Xenon Light Support and Basic Settings
- Comfort Systems (Seat, Door, Navigation)
- Maintenance support: Reset of parking brakes (SBC, EPB), ABS bleeding

**** Individual features always depend on manufacturer, model and year of manufacturing. Please ask us for a system list**

Different diagnostics software bundles and packages are available:

Software-bundle:1 for european vehicle manufacturers (Europe14+1): (either with or without connector kit for older vehicles)

EOBD, Mercedes-Benz, BMW, VW (Audi, Seat, Skoda), Opel (Vauxhall), Ford (Europe), Fiat, Citroen, Peugeot, Renault, Volvo, Jaguar, Smart, Sprinter, Alfa Romeo

Software-bundle:2 for ASIAN vehicle manufacturers (Asia 14+1): (either with or without connector kit for older vehicles)

OBDII, Toyota, Honda, Nissan, Mitsubishi, Mazda, Subaru, Suzuki, Isuzu, Daihatsu, Hyundai, Kia, Ssangyong, Daewoo, Brilliance

Software-bundle:3 (Europe / ASIA Full Package) (either with or without connector kit for older vehicles)

Software-bundle :1 + Software-bundle:2, Rover, Porsche, SAAB, Lancia, Land Rover, Chrysler

24 months manufacturer warranty

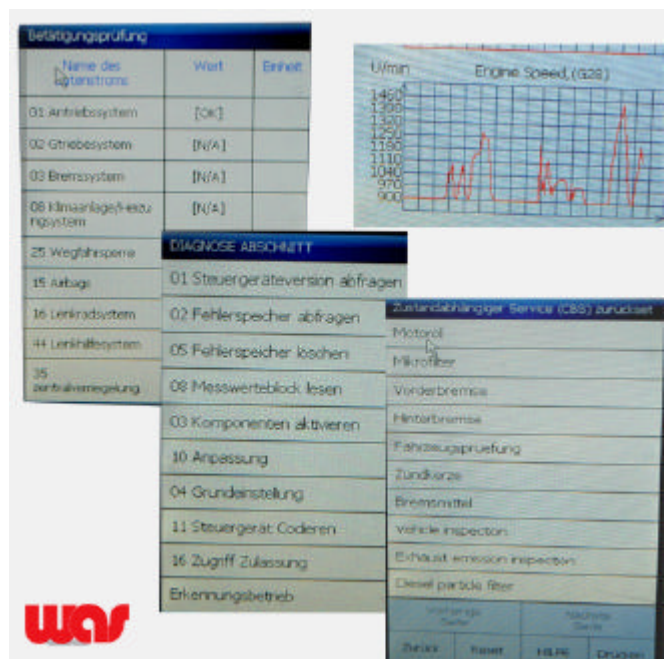

Technical data:

Windows CE 5 operating system
High resolution LCD touch screen color display 4,3"
Rechargeable lithium-ion 1530 mAh battery
USB connector for printing or software updates
Memory card: 1 GB
Mains power supply: DC5V network adaptor
X-431Diagun connector: DC12V/24V

Feature rich vehicle diagnostics computer LAUNCH X-431 DIAGUN

- Very attractive entry level price
- Intuitive to use and operate
- Reading code numbers and description
- Actuator test and component activations
- Save measurements and display graphically
- Check ECU status
- Injector coding (depends on manufacturer)
- Display diagnostics socket location
- Basic settings of components (TPS, EGR values, transmission, air-conditioning system)
- System search (depends on manufacturer)

**** Individual features always depend on manufacturer, model and year of manufacturing. Please ask us for a system list**
