

HingeMaster™

Finally there is a solution for adjusting welded door hinges without marks or damage.

HingeMaster™ solves the problem instantly and saves time and money!

Forget damage to paint and hinges when adjusting them. With this easy to use quality tool, hinge adjustment in any direction is possible thanks to the smart design.

HingeMaster™ locks on to the hinge and tightens with help of an arm twist so there is no play between the hinge and the tool which makes it possible to control the adjustment much easier compared with traditional equipment.

HingeMaster™

Endlich eine gute Lösung zum Richten von geschweißten Türaufhängungen.
Bestell-Nr. **WAS** ST.1100

Can be easily used in combination with collision repair systems of CELETTE , BLACKHAWK, CAR-O-LINER and many more.
